Blackmagic Camera for iOS

Free

Blackmagic Camera unlocks the power of your iPhone or iPad by adding Blackmagic's digital film camera controls and image processing! Now you can create the same cinematic 'look' as Hollywood feature films. You get the same intuitive and user friendly interface as Blackmagic Design's award winning cameras. It's just like using a professional digital film camera! You can adjust settings such as frame rate, shutter angle, white balance and ISO all in a single tap. Or, record directly to Blackmagic Cloud in industry standard 10-bit Apple ProRes files up to 4K! Recording to Blackmagic Cloud Storage lets you collaborate on DaVinci Resolve projects with editors anywhere in the world, all at the same time!

Camera Controls

Lens Selection
Based on device. Selection of front and back lenses.
